## Basic Carts

One frame -  
unlimited possibilities!

**Unlike the name might suggest, the Treston Basic cart is anything but basic! This modular cart equipped with an ergonomic handle has a wide range of accessories that can be used to adapt the cart to meet the user's specific needs, and it is ideal for LEAN production environments.**

The cart is effortless to move and serves well as a tool cart, for example. Among others, stacking bins, different types of shelves, and perforated panels, as well as a perforated panel cabinet, can be added to the basic cart.

- ✓ A highly adaptable, powder-coated (RAL 7035) steel cart
- ✓ The frame includes a pull handle, a bottom shelf, and a rubber mat as standard parts
- ✓ All the accessories of the M30 modules are compatible with the cart
- ✓ Total load capacity 772 lbs, height 64"
- ✓ Four swivel castors (5"), two with brakes
- ✓ Combinations are also available with ESD protection
- ✓ Its adaptability makes this cart an ideal solution for LEAN production environments

**Work is not always confined to a single space. This is especially true for heavy equipment manufacturers. For that reason, Treston has designed an extensive range of mobile carts for the purpose of bringing tools and equipment to where they are needed.**

Treston tool carts eliminate unnecessary time spent running between the tool cabinets or work bench, and the work area. This time saved can equate to greater productivity, cost-savings, and an increase in profits. Proper tool storage can also reduce costs associated with replacing lost tools.

As shown above, tool board carts, paired with tool shadows, help companies visually control their tools and equipment. Treston customers who have implemented tool carts as part of their LEAN processes have seen significant increases in productivity and profits.
