TKT

The Ideal 5S Tool Storage Solution

★★★★★ *“Excellent and very unique product for our high density tool storage needs. Also makes tool control so much easier as we can note missing tool with a glance at each panel. Was very easy to assemble and smooth operation. Solved our tool storage organization challenges.”*

The TKT tool storage system requires only 21.5 ft² of floor space and provides 172 ft² of storage space. There is no need to attach it to the floor, as it stands firmly on its own. There is a castor on the lower edge of the panels which makes them easy to move.

The load capacity is 220 lbs/panel. Includes 4 panels; additional panels are available (ordered separately). A maximum of 10 panels can be attached to the tool storage system.

- ✓ Unit holds up to 10 panels - base unit includes 4 panels
- ✓ Load capacity 220 lbs/panel
- ✓ Large variety of hooks available
- ✓ Enclosure available upon request
- ✓ QuickShip product - ready to ship in 5 days!
- ✓ Visual tool storage reduces costs of tools - an ideal 5S solution!

Order and tidiness cannot be achieved and maintained without there being a place for each tool. Perforated panels and hooks offer a practical and versatile solution for storing tools and equipment.

According to the philosophies of LEAN and the 5S method, the implementation of the manufacturing process should be based on optimizing the organization of tools, material flow, and people; avoiding loss and unnecessary work; and minimizing setup times. The modular and ergonomic workstation and material flow solutions developed by Treston are designed for manufacturing environments in which the optimization of process steps is needed. Treston products, which can easily be modified with accessories, support LEAN thinking and enable optimized process design and implementation. Treston products also take into account the individual needs of employees and the changing needs of companies, including small batch sizes and changing set-ups and series.
